What you need to know before making a payment

You can use this service to make a variable direct debit payment from a New Zealand bank account.

It may take up to 3 business days for your payment to show in the bank account.

As long as you make a payment on or before the due date, it won't incur a late payment penalty. If you are setting up a direct debit to pay on a non-business day, it will be processed on the next business day.
