Waikato Dairy Farming Benchmarking

CooperAitken have a long and proud history of supporting the Dairy Industry in the Waikato which is reflective of our Annual Waikato Dairy Farming Benchmarking reports that span back over four decades.

We stopped producing our reports in 2014 with other options being available during that time, however due to many requests and the need for timely and actual results based on a large dataset, we are excited to revive the stats and provide quick and timely actual cash basis results.

The reports have been collated by our team from actual cash trading data of our Dairy Farming clients throughout the Waikato region. The stats currently include a data pool of approx. 90 and this is something we plan to grow year on year.

Download our 2020/21 season reports and watch our video to hear how the data was collected, what it means & the benefits of using benchmarking in your business.
